Women's Patriotic Aid

At a general meeting held on Tuesday, Oct. 24th, at which thirteen members were present, it was decided to dissolve the above society. The minutes of this meeting are as follows:

The minutes of the general meeting held on Tuesday, Sept. 26th, were read and adopted.

The following motion was moved and seconded:—That the Women's Patriotic Aid be dissolved and that a public meeting be called to organize a branch of the Imperial Order of the Daughters of the Empire." This motion carried.

The following ladies were asked to make arrangements for this public meeting:—Mrs. Reinecke, Mrs. McKinnon, Mrs. Steeves, Mrs. Simpson, Mrs. Elliott, Mrs. R. E. Moffatt, Mrs. Watt, Mrs. Kidd, Mrs. Harvey, Mrs. Turner, Mrs. G. W. Watt.

This motion was moved and seconded:—That the Women's Patriotic Aid be kept back to pay for advertising and to meet other expenses in connection with the public meeting mentioned above.

These minutes were read at the end of the meeting and were approved by those present.

Tea was served for which a small sum was paid by every member present resulting in one dollar and sixty cents which was handed to Mrs. Watt with the instructions to hand this sum together with the general fund of the Women's Patriotic Aid (less the five dollars mentioned above) to the Claresholm Branch of the Patriotic Aid.

(Signed) Jessie G. Watt

The auditors report will appear next week.

School Notes

The Literary Society held a meeting on Friday, October 20th, Grades VII to XII inclusive were in attendance. The Hon. President, Mrs. McKinnon, gave a splendid speech on the two popular words "Efficiency" and "Service."

The Claresholm High School played Macleod High School on Saturday, Oct. 21st, at Macleod. The Claresholm girls won at basket-ball with a score of 75, while the boys lost at football with a score of 0-4.

Next Saturday the Macleod basket ball and football teams hope to come to Claresholm. The basket-ball game will be played in the school grounds and the football game at the Fair grounds.

Two weeks ago a debate was held in grades X and last week in grades XI, XII, and the first grade, V and VI, grade XIII winning. Another is arranged between some of the winners of each. The subject, which is one of the Provincial Debating subjects, is "Resolved that military training should be established in the schools of Alberta."

The citizens of Claresholm are invited to attend these meetings which are held every second Friday at 3 o'clock in the Assembly Hall.

The High School extends its sympathy to one of its members, Roscoe Williams, in the death of his brother.

Musical Competition

A piano competition will be held in the auditorium of the public school, Tuesday evening, Nov. 7th, commencing at 7:30 p.m. At which over forty piano pupils of W. G. Moffatt will compete for prizes.

The competitive pieces selected are: "The Concerto," "Bachman," "Lester," "Bachman," "La Cœur-Brise," "Gillet," "Sennade," "Lange," "Sweet Flattery," "Schnecke," "Rustic Dance," "Schneller," "Fable," "Schindl," and "Cendrillon Bachman."

The admission fee of 25 cents for adults and 10 cents for children will be charged, all pupils taking part in the competition will be admitted free.

The judges will be chosen from musical people in Claresholm, and will be announced later.

Any money over and above the cost of the prizes will be turned over for Patriotic purposes, and with this end in view the ladies will sell candy during the evening.

Correspondence

Who is to Blame?

Editor, Claresholm Review.

Dear Sir—The Ratepayers of Claresholm are a lot of easy going people and are not given much to kicking, but I think the time has come when we must know who is responsible for the failure of our electric plant to give us light on Sunday evenings, and also in the mornings. Is the Town Council to blame? Or is it our old friend Mr. Nobody? Anyhow we should be told. We hear various rumors about lost boilers, broken pipes, etc., but nothing definite as to what has happened. The plant will be in full swing and giving us the service that we require. If the council cannot supply the people of this town with light when it is required why don't they give it up? Their "dog in the manger" policy and let us have what we want. It is quite a number of homes people in town who are unable to conduct their business as they should do, owing to this defective light service. I think about fifteen business places need this morning service. There are also other things that do not seem to be at all satisfactory, but I think at present the light problem is the one most needing attention.

Yours sincerely,

Quizzzy

Hill Breezes

A. E. Fletcher and J. Bailey were visitors in the Hills a few days ago.

Baird Bros. have finished their threshing, and are now rushing the job at McD. Bros. farm.

W. G. Smith has finished his potato digging, and expects to ship a train load east shortly.

R. B. is not so dependent since old familiar voice is back at central calling out (number) again.

For Remington, of Lime Kiln Ridge, is very busy trying to get evened up with his work, but is still pretty well back in the race.

Mrs. Smith had a new foundation under her house, which makes a big improvement.

It seems a little queer that a fork cannot be left at a stake for a day or so without someone wanting it bad enough to go and take it without leave. Possibly it will come back, as it is pretty well known who it is.

W. Cochrane is quite busy stacking green feed, but expects to be finished soon.

W. Fletcher, who had the misfortune to break his ankle, is getting along nicely.

The snow storm of the 17th put a full stop to the work of the shoemakers, but A. E. Fletcher and W. Cochrane expect, in any case, to finish by Xmas.

Some are trying to agitate some-
thing in aid of the Red Cross Fund. Wake up boys and get a move on
it will soon be winter.

Obituaries

The whole community was greatly grieved last Friday to hear of the death of Mr. Lester Williams. Leaving home on Saturday last he went to Calgary to undergo what was thought to be a slight operation. When on the operating table, the surgeon discovered that the small growth near the ear bone was a cancer, and that it was attached to the lungs. He never gained consciousness again, and died about 5:30 p.m. on Oct. 26th. Mr. and Mrs. D. Williams were on their way to town to catch the north bound train when the news came through of his death.

Walter was 21 years of age last July, and was a young man highly respected by those who knew him. He was greatly interested in religious work, and since his return from Bell's View College, Toronto, has been a very active worker in the Star Line mission.

Some time ago he was concerned about enlisting, but was declared physically unfit.

The funeral took place from the Methodist Church on Sunday after-

noon, Rev. W. E. McNiven and J. W. Hallett both taking part in the service. The church was crowded to the utmost with sympathizing friends. The bereaved family has the heartfelt sympathy of the entire community.

Violation of Pool Room Act

Further complaints have come to us regarding the violation of the Pool Room Act during the past week. Every pool room keeper should know the law and know that he is allowed to keep open. The law regarding this matter is as follows:

"Every Pool Room shall be closed and remain closed from and after the hour of eleven o'clock on Saturday night until the hour of six o'clock on the following morning, and during such prohibited hours no game of any kind shall be played therein."

The law also requires that a copy of the Act be posted in every Pool Room.

A Business Change

A. W. Fletcher will regret that the big drug Co. stores has been sold. The business was purchased nine years ago from Fager & Ross and since then the old frame store has been replaced by a fine brick building. During recent years it has been operated by Mr. Clark and sons, and a splendid drug has been built up.

The new owner, however, is a man who is not well known in this part of the country. Mr. W. D. Annable, who since leaving Claresholm in 1913 has been in business in Barons. Many of old friends will be glad to see him again doing business in Claresholm.

Running a business without advertising, is like winking at your girl in the dark. You know what you are doing, but no one else does.

:# LADY # URSULA'S HUSBAND

By
FLORENCE WARDEN

Ward, Lock & Co., Limited

TORONTO

(Continued.)

Paul looked up, and there was a pause. Then Lord Eastling looked steadily at his brother-in-law.

"I suppose I am not raising his eyebrows slightly, as if expecting him to retire. But Lord Eastling held his tongue.

Lady Ursula, seeing that both men were irritated, and vaguely fearing an argument, turned to take the two of them away without asking any more questions. Paul had his own instructions.

Lord Eastling, feeling the awkwardness of his position, and that Paul had been sent to him, was moving unwillingly towards the door. But these words arrested him, and he stopped.

"Surely," he said, "you don't mean to let that fellow take away anything of mine?"

"I mean to let him go, and to the street with half a sovereign."

He saw that the circumstances were not propitious for a quarrel.

Lady Ursula agreed with him, for she hastily put away the last of the tea, and went into the kitchen.

She knew that something was wrong, and she did not dare to ask what it was.

She hoped that it was something the husband would change his mind. Still, she was too proud to risk the genes which Paul had given her, and she kept silent.

How could Paul fail to see this, too?

Suddenly she looked up at him inquiringly. He was very pale, and Lord Eastling was facing each other.

"It's a pity, Eastling," said Paul, "that you can't learn to mind your own business."

"I've found meaning other people's business to succeed best," retorted Paul, with a dazzling smile.

"What do you mean?" asked Lord Eastling.

"I've had a hand in bringing about a number of very serious and grave scandals," said Lord Eastling boldly.

His frank reminder of the way in which he had played detective threw Paul into a rage. He sprang from his chair, and, with a shout of alarm, threw herself between them.

"Think what you're doing, thinking what you're doing," implored, speaking in a low voice, in thrilling tones of passionate appeal. "No, no, no."

The words, the tone, the tenderness with which she stirs a hand out, and then pulls it away, and then apart, and at the same time impressing upon them her own affection now, had a most powerful effect, and had an instant effect upon both men. Lord Eastling took his sister's hand in his.

"I'm sorry, dear," said he, "that I lost my temper. After all, and he raised his hand to his brother-in-law, "perhaps I can be more useful downstairs than I can here."

He dropped Lady Ursula's hand, and went quickly out of the room, and into the kitchen, where he prepared for his wife's sake, burst from Paul's lips.

"I can see that he doesn't make mischief," said he quickly, and with a mirthful air to Lady Ursula, who tried to smile, but her sleeves, to detain him, he got rid of her, and then, imploring hands and followed the maid.

Lord Eastling was, as Paul had expected, making his way to the room where the young man was staying. Paul overtook her near the door.

"What are you up to?" he asked sharply.

"I was going to speak to the jeweler," said Lord Eastling.

There was a pause; they were still so fiercely engaged that they did not seem to pay to the threat of the other.

But Paul realized that he had no more time to waste. Lord Eastling had the young man had to leave from him, and he suddenly altered his tone.

"I have no comparative amability in my looks and manner," that he was a police officer waiting on the grounds.

"He left the way into the empty breakfast-room, shut the door and turned to the jeweler.

"Now," said he, "will you tell me what the Dickens you mean by interfering in this way in my private affairs?"

Alone with the other, Lord Eastling was in a quandary.

"Of course I'll tell you," he said gently, "if there's any need of telling."

"Explain yourself."

"That fellow in the other room is no more a respectable jeweler than I am."

"No more respectable than you are, in fact," said Paul, with a smile of insolence. "But he's a jeweler, and that's all."

"I'm sorry, but I choose to trust my pro-

For Better Crops

Selected Seed Will Increase the Yield of Grain

Every farmer is anxious to increase the yield of his crops, but too few know the secret of the way in which this can be done. Our seed is the result of many years of experience, and is the result of the average number of bushels per acre.

With the use of our seed, we can make a considerable economic ray in the cost of production.

With the use of our seed, we can make a higher net profit per acre.

It is certain that an increase in yield is the least expensive of the elements of fertility ordinarily purchased in the market.

With the use of our seed, we can increase the yield of grain in most soils than nitrogen and phosphorus.

The fact is that the bulk of the grain produced in Canada has been cut off so as to greatly increase the cost of production.

With the use of our seed, we can increase the yield of grain in most soils than nitrogen and phosphorus.

The fact is that the bulk of the grain produced in Canada has been cut off so as to greatly increase the cost of production.

Quite a number of Granumites went to Claresholm Wednesday night of last week to see the Bostonians, and returned the flyer at four o'clock in the morning.

A very quiet wedding took place in Calgary last Thursday, when Miss Tena Dixon and Mr. Oscar Edwards were united in marriage. The many friends of the happy couple join in hearty congratulations.

There seems to be quite an interest taken in the public schools and there is some talk of forming a couple of teams to make the game more interesting. Those interested should see

that the teams are formed as this would be a good way to while away some of the long winter evenings.

The Value of Marquis Wheat

The Marquis wheat is worth more to Canada than all the Canadian experimental farms have cost," said L. H. Newman, secretary of the Canadian Wheat Commission, in a speech today, upon his return from an extensive tour of the prairie provinces.

It is hard to compute its value. Although it was only first distributed about five years ago, it is now the most popular wheat in Western Canada, and probably second in the rest of the country. "I think I can safe in saying that if the Red Fife wheat had been grown all over the country and Marquis had not been produced, we would this year have a crop of fifty million bushels less, which at prevailing prices would have meant a loss to the country of from forty to seventy-five million dollars."

Orrville Wright, the noted American aerospace investor, has just presented all his patents free of charge to the British Government. They are worth millions of dollars and all manufacturers will be able to use them.

Five thousand men are wanted at once for the Canadian cavalry.

NOTICE OF
JUDICIAL SALE OF
FARM PROPERTY

Pursuant to the Judgment and final decree of the Master in a certain action between Frank McLean, Plaintiff in the Supreme Court of Alberta, Judicial District of Calgary, No. 1000, the Plaintiff, on Saturday, the 25th November, A.D. 1916, the following farm property situated in the Southwest Quarter of Section 34, in Township 11, Range 27, west of the 5th meridian, Alberta.

The vendor states that the property consists of 160 acres more or less and is in good condition. The land is under cultivation but the whole quarter section is good arable land, with a good supply of water from the Bow River, which flows through the property. The Bow River is about 7 miles from Claresholm Post Office and Railway Station, and about 10 miles from the Bow River Railway station and 7 miles from Claresholm Post Office and Railway Station, Alberta.

The vendor states that the property is in good condition and will be devastated were it not for the British army and British navy. It might awaken us to the seriousness of the situation if a few Zeppelins were to drop some bombs on one of our Canadian cities.

Major Robbins, who was next called on, said that his advice was to hold on, by expressing his pride in the 360,000 Canadians who had responded to the call of humanity, and who were carving their names in the nation's history. Proud of the men, who the British general said "they saved the day," and "never shirked a blow," Major Robbins said that he had no fear of the outcome of the war, but had a piece all over the Dominion, and proud of the manner that Canada at the beginning of the war, with such remarkable speed, gathered her first army of 35,000, and dispatched them to the front to help the army of the neutral countries in holding back the British lines.

Major Robbins dealt very plainly with the conditions that existed in Germany that led up to the war, and the fact of his having lectured to the students in one of the universities of Germany previous to the war, added weight to his words. He described the teaching that was given in Germany, that "might is right," that the poor and weak must be crushed out of the way of the strong, and that the goal was for the man or nation with the strongest arm. He referred briefly to Berthold and his doctrine of war. "We must settle our account with France. France must be so completely crushed that she will never be our pathway again." He thought France was ready for her funeral. But, said the major, France is demonstrating that she will shed her last drop of blood before she will surrender to British tyranny. Germany must be beaten to the bottom, and the world's eyes must be crushed out of the way of the strong, and that the goal was for the man or nation with the strongest arm.

He referred briefly to Berthold and his doctrine of war. "We must settle our account with France. France must be so completely crushed that she will never be our pathway again." He thought France was ready for her funeral. But, said the major, France is demonstrating that she will shed her last drop of blood before she will surrender to British tyranny. Germany must be beaten to the bottom, and the world's eyes must be crushed out of the way of the strong, and that the goal was for the man or nation with the strongest arm.

The organizers are quite hopeful of minimizing the number of gossips, because they are convinced that the worst offenders talk scandal from a matter of habit than really mean anything. The anti-gossip crusade does more harm than anything else in the world, and if the organizers of the anti-gossip crusade have only the preservation and courage to make it universal they will do inestimable good for the general happiness of the community.

The organization may not spread to all the schools, but it is to be hoped that here as much as anywhere. It would, however, be well to remember that there are three good rules which should govern our tongues before making a statement about anyone: "Is it true?" "Is it necessary to repeat it?" "Is it kind?"

There are some living not far from our town who would be far happier if these rules had been generally observed.

Painting of Farm Implements

The painting of farm implements for their protection and preservation has apparently received very little consideration by Canadian farmers, if one may judge by the information secured by the commission of Control on the subject.

Patriotic Meeting

The Patriotic Meeting of last Monday night was one of the most enthusiastic gatherings ever held in Claresholm. The open hall was well filled and every seat occupied. The speakers and audience of the two eloquent addresses that were given. Major Kirby, in opening his address, said that never since the world began was there such a worldwide emergency as at the present time. Christian nations have awakened to the fact that they have been duped into supporting the world war, and he said was going to be a testing time for the nations of the earth, and victory is already won, when we choose to stand at all costs, on the side of right. Major Robbins' eloquent address was well received, and he spoke of the British soldiers who had been killed in the war, and the soldiers fighting for self-governed, and for the soul of humanity against brute pagan Prussian force. Christianity has not failed; God has not abdicated his throne. The plain and bounden duty for every man was either to go to the colors or to stand by the side of his wife, home and children.

The British army, but the enemy of the world, the enemy of the realm.

Major Robbins' eloquent address will be long remembered, and no doubt will help to stimulate recruitment.

the hows and whys, apart altogether from the general improvement in appearance. The cost of prepared paint for the purpose is very small, and experience in the work is unnecessary.

The initial cost of farm implements is high to the farmer, largely on account of depreciation from rust, and rust is rapid, when once these conditions are established. For the actual money saving as well as for appearance the more regular overhauling and painting of the farm implements should be a recognised part of the year's work.

The president of the Navy League in the U. S. A., after spending twelve months in Europe, predicts that Germany can hold out until 1921, and that it should take three years after she is driven within her own borders.

Public Notice
